June Prime Lamb

Environment Policy

June Prime lamb believes sustainability is doing the right thing for our employees, our suppliers, our communities and the environment whilst being mindful of our impact on our people and the world.

June Prime Lamb endeavours to operate efficiently and in an environmentally responsible manner.

June Prime Lamb's key objectives include:

1. Optimising the use of renewable energy by establishing reliable solar energy facilities.
2. Optimising the reuse of waste water by assisting to establish regenerative farming practices whereby that water is recycled and used to preserve soils and to generate fodder for livestock.
3. Ensure all products and by-products are fully utilised so that none go to landfill.
4. Utilise fully recyclable packaging wherever possible.
5. Ensure all recyclable packaging is fully utilised by appropriate facilities.
6. Where possible, establish facilities to generate reusable bio-gas for internal consumption and energy generation.
7. Identify other opportunities for improvement as they arise.

In identifying these opportunities, June Prime Lamb is already proactively progressing:

1. Establishment of an on -site solar energy facility.
2. Establishment of a water recycling facility to treat waste water and recycle that water to generate growth of fodder.
3. Establishment of bio-gas generation and utilisation resources.
4. Reuse of all recyclable packaging.
